

Curriculum vitae

Personal Information

FIRST NAME / SURNAME	Andrei Josanu
ADDRESS	Republic of Moldova, Kishinev (Chişinău)
TEL	+373 69 791 222
EMAIL	josanumail@gmail.com
NATIONALITY	Moldovian
DATE OF BIRTH	29.12.1985 (38 years old)
GENDER	Male
DESIRED POSITION	WordPress engineer skilled in ReactJS and Laravel.

Work Experience

DATES	2017-2018
POSITION	WordPress Back-End Developer, Project Manager, Client and Team Management
RESPONSIBILITIES	I entered the IT field more as an entrepreneur than a web developer. For me, building the team itself was a project. I was responsible for everything from maintaining office order and managing day-to-day processes accounting, team interactions, marketing, and sales, to ensuring the quality of services. At one point, I realized I needed to take another path to fulfill my dream of creating my own products.
EMPLOYER / ADDRESS	Inweb Solutions S.R.L.
TYPE OF BUSINESS	IT Services
DATES	2018 - June 2021
POSITION	Wordpress Developer
RESPONSIBILITIES	At this company, I advanced significantly in my profession. I learned the importance of task management, quality responsibility, and effective communication. My responsibilities included:

- Create the information structure (taxonomy system, custom tax&post types)
- Starting to create Custom Plugins and Themes
- Clean projects from viruses, updated from old code, speed optimisation, code refactoring and much more stuff like this
- Organise brainstorming sessions to come up with ideas and do tasks management

EMPLOYER / ADDRESS **Simpals S.R.L.** (<https://simpals.com/>)

TYPE OF BUSINESS Media and product projects, IT services.

DATES **June 2021 - May 2022**

POSITION Full Stack Wordpress Developer

RESPONSIBILITIES At this company, I had the opportunity to develop projects in a more modern and technically advanced manner. My responsibilities and achievements included:

- Learning the basics of ReactJS and the Laravel Framework
- Developing custom Gutenberg blocks
- Utilizing tools like WP-CLI, the Bedrock Framework and Laravel approaches in custom WordPress projects.
- Working with the PHP Blade Template Engine, using OOP PHP and vanilla JavaScript
- Leveraging Git, Docker, and Composer for efficient project management and development

EMPLOYER / ADDRESS **Best4U International** (Dynamitt Team)

TYPE OF BUSINESS IT Services

DATES **From May 2022 - July 2023**

POSITION Full Stack Wordpress Developer

RESPONSIBILITIES In this company it was possible to take the next step with ReactJS experience.

EMPLOYER / ADDRESS **BackstageIT B.V.** (<https://www.backstage-it.nl/>)

DATES **From July 2023 - October 2025**
POSITION Full-Stack WordPress Engineer with Laravel Framework skills.

RESPONSIBILITIES Working for Watches World Company. A global e-commerce platform that buys, sells and exchanges luxury watches worldwide. I was solely responsible for the company's sales website. Here I had the opportunity to leverage all my experience and knowledge in this field to drive impactful outcomes.

- **Problem-solving for CI/CD:** Implemented and maintained continuous integration and continuous deployment processes.
- **Optimizing website loading speed:** Enhanced site performance for a better user experience.
- **Project analysis and documentation:** Conducted thorough project analysis and maintained detailed documentation.
- **Reorganizing information architecture:** Improved the site's information structure for better navigation and usability.
- **Creating tasks, timelines, and management:** Developed and managed project plans, including task creation and timeline management.
- **Technical documentation and Git workflow:** Authored technical documentation and established a Git workflow suitable for the team.
- **Balancing immediate and long-term needs:** Prioritized urgent tasks while planning for long-term maintenance.
- **Team leadership and supervision:** Led the development team, supervised other developers, and provided hands-on involvement as needed.
- **Front-end optimization:** Improved front-end performance without extensive refactoring.
- **Future-proofing projects:** Identified methods to work with an incorrectly structured project to facilitate future migrations.

EMPLOYER / ADDRESS **Quadra-Digital S.R.L.** (<https://watchesworld.com/>)

DATES **August - November 2024**
POSITION WordPress Theme Developer.

RESPONSIBILITIES This was a temporary position where I was excited to contribute to the improvement of WPZOOM's flagship product.

- Brainstorming and proposing ideas for useful functionality
- Analyzing competitors and identifying viable features
- Implementing these features on both the back-end and front-end, including the theme administration panel

EMPLOYER / ADDRESS **WPZOOM Holding B.V.** (<https://www.wpzoom.com/>)

DATES **From October 2025 - Present**
POSITION WordPress Full-Stack Developer & Tech Lead at jmattachments.com

RESPONSIBILITIES **Tech Lead - E-commerce Project (US)**
Working as a Tech Lead on a large-scale e-commerce platform serving the US market.

Management:

- Creating and managing development tasks based on technical and business requirements
- Analyzing the existing system and proposing refactoring strategies and improvements
- Coordinating development priorities and maintaining technical clarity within the team
- Working with JIRA and Bitbucket
- Creating technical documentation
- Wrote technical documentation and onboarded team members who had no prior experience with this workflow
- Provided technical guidance to improve development practices and implementation quality

Technical

- Designing and reviewing architecture and implementation approaches

- ▶ Proposed and initiated a theme refactor based on a custom framework applying modern front-end practices
- ▶ Implemented Bitbucket Pipelines optimized for deployment on shared hosting (SiteGround)
- ▶ Defined and introduced the Git branching workflow used by the team
- ▶ Created a Docker image used as a standardized development environment for the team
- ▶ Designed the setup so the Docker environment can be easily installed and synchronized with production content
- ▶ Performed PR reviews and resolved complex merge conflicts
- ▶ Preparing the theme architecture for modularity and future headless integration
- ▶ Refactored a critical feature into separate modules and classes, applying modern coding practices based on SOLID principles and OOP to simplify future modifications and ensure maintainability
- ▶ Implemented security enhancements and a robust logging system
- ▶ Performed routine maintenance tasks such as CMS updates and cleanup, performance analysis, SEO support, and ensuring adherence to WordPress standards

EMPLOYER / ADDRESS **JMA Attachments** - <https://jmattachments.com>
8068 NW 29th St, Doral FL 33122, USA
